

The 25 Hottest Edge Security Companies: 2020 Edge Computing 100

As digital transformation and COVID-19 rapidly shift users, devices, applications, services and data outside of the enterprise data center, here's a look at 25 vendors capable of securing the Edge of tomorrow.

Barracuda Networks

Campbell, Calif.

Top Executive: BJ Jenkins, President, CEO

Barracuda in July debuted the first secure global SD-WAN service built natively on Microsoft Azure to optimize performance and minimize cost by replacing inflexible network connectivity circuits. The company in November purchased remote access vendor Fyde to provide employees and contractors working from home on BYOD equipment with secure access to cloud or on-premises applications and workloads.
