Barracuda Backup
Easy Cloud-Connected Backup

vmware READY

Barracuda®

Barracuda Backup is a unified, cost-effective data protection solution for your physical, virtual, and SaaS environments. It's a complete backup solution with remote storage that is **easy to buy, install, and manage.**

The Barracuda Advantage
• Simple pricing with no per-application or per-server licensing fees.
• Backup software, local storage, and remote storage that can be rapidly deployed in under an hour.
• Cloud-based central management for seamless multisite administration.
• Rapid local or remote recovery, preventing data loss and minimizing down time.
• Available as a virtual appliance that can be deployed without requiring additional hardware.

Product Spotlight
• Built-in cloud and site-to-site replication prevent data loss in case of disaster.
• LiveBoot and Cloud LiveBoot enable rapid recovery of VMware and Microsoft Hyper-V virtual machines in minutes.
• Cloud-to-Cloud Backup protects Microsoft Office 365 environments from data loss.
• Offsite vaulting of historical revisions frees up valuable space on local storage.
• Compression and deduplication for up to 50X reduction in storage and bandwidth requirements.

Physical and Virtual
Most businesses today have a mixed environment of physical and virtual servers. Barracuda Backup is a single solution to protect physical servers and virtual machines (VMware & Hyper-V) with snapshot and granular file recovery—all with unified management for replication and retention.

All-in-One Backup Solution
Barracuda Backup is a complete solution that comes from one vendor. It combines software, in-line deduplication, and offsite cloud or private replication without per-server or per-application licensing fees.

Flexible Deployment
Barracuda Backup is available as both an all-in-one physical appliance or virtual appliance.

Barracuda Cloud Storage, Cloud Control and Cloud LiveBoot recovery allow simple remote replication, seamless multisite administration, and rapid access to virtual machines during site disasters.
Site-to-site replication, Local Control management, and Local LiveBoot recovery allow complete protection for those operating in private environments or deploying private cloud technologies.

Cloud-to-Cloud Backup
While Software-as-a-Service and cloud-hosted environments, such as Microsoft Office 365, are a fantastic way to mitigate natural and mechanical failures, human-caused data loss is still ever present.

Office 365 ⎯⎯ Barracuda Cloud

Barracuda Cloud-to-Cloud Backup for Microsoft Office 365 environments protects Exchange Online, OneDrive for Business, and SharePoint Online from accidental deletion and data loss.

Sources	Backup Appliances	Replication	Long-term Retention
Office 365		Barracuda Cloud	Offsite Vaulting
Physical Environments	**BU** Barracuda Backup	Physical Appliance	Backup Export Tool
Virtual Environments	Physical Virtual	Virtual Appliance	amazon web services
Microsoft Hyper-V **vm**ware®			Disk Tape

Key Features

Backup
- Full local backup and restore
- Inline, block-level, source- and target-based deduplication and compression
- Built-in WAN acceleration
- Cloud or site-to-site replication
- Real-time inline replication to offsite storage
- Export to external disk, tape, autoloaders, or robotic libraries
- 256-bit AES of data in transit and at rest to remote locations
- Near-continuous data protection
- VMware Changed Block Tracking (CBT)
- Single agent for Windows systems and applications

Offsite Vaulting
- Vault historical revisions offsite to Barracuda Cloud Storage or a remote location
- Extend offsite-only retention up to 12 monthly and 7 yearly revisions

Long-term Retention
- Backup Export Tool allows archiving to tape, external media, and Amazon Web Services (AWS)
- Supports archiving to virtual tapes stored in AWS Simple Storage Service (S3) and Glacier using the AWS Storage Gateway-VTL

Recovery
- Restore physical server backups into vSphere and Hyper-V virtual environments with Physical-to-Virtual (P2V) restores
- Bare metal restore for Windows and Linux environments
- Download or recover data from anywhere at anytime without the need for a local appliance
- Seamless access to local and offsite data from a single pane of glass
- Rapid VM recovery with LiveBoot and Cloud LiveBoot for VMware and Microsoft Hyper-V environments
- Granular file recovery for VMware and Hyper-V
- File revision history
- Granular Microsoft Exchange message-level recovery
- VMware CBT restores

Granular SharePoint Recovery with Kroll Ontrack
- Granular file search and recovery
- Restore to multiple locations

Virtual Appliance
- Support for VMware and Microsoft Hyper-V environments
- Simple per-socket (CPU) pricing for virtualized environments and per-server pricing for physical servers.
- Built-in replication to Barracuda Cloud Storage or remote site

Administration and Policy Management
- Central management through Barracuda Cloud Control
- Local management through Barracuda Local Control
- Data transfer rate limits
- Health status monitoring via mobile apps
- Role-based administration
- Flexible data retention
- Backup exclusion rules

Reporting and Statistics
- Server health monitoring
- Network traffic utilization
- Storage efficiency
- Replication outage notifications
- Detailed restoration reports
- Audit logs and offline notifications
- Automated email reports
- Large item reports subscriptions

Energize Updates
- Award-winning live 24/7 customer support
- Firmware updates
- Automatic agent upgrades
- No per-feature or per-application fees

Instant Replacement
- Next business day shipping on hardware replacement gets you back up and running fast
- Includes hardware refresh every four years keeping you on the latest platform at no additional cost
- Disaster recovery service preloads most recent data and configurations onto replacement hardware in the event of a disaster

Unlimited Cloud Storage
- All the storage you need to replicate Barracuda Backup to the cloud and extend retention with offsite vaulting

Cloud-to-Cloud Backup
- Stand-alone subscription for direct-to-cloud backup that protects Microsoft Office 365 environments, including Exchange Online mailboxes, OneDrive for Business files and folders, and SharePoint Online
